This report contains information on average prices and values of production for major field crops and many specialty crops. All prices in this report are marketing year average prices, which are based on sales in the months comprising each commodity's marketing year. State value of production is computed by multiplying each state's price by its production.

United States Value of Production for Field and Miscellaneous Crops Up 23 Percent in 2021

The United States value of production for field and miscellaneous crops is estimated at \$201 billion in 2021, up 23 percent from 2020. Alabama value of field and miscellaneous crop production totaled \$1.26 billion, up 21 percent from the previous year. At \$332 million, Alabama's leading value of production was corn for grain. The value of Florida crop production totaled \$1.17 billion, down slightly from 2020. Peanuts represented the largest value for Florida at \$130 million. The value of Georgia crop production was estimated at \$2.61 billion, an increase of 20 percent from the previous year. The leading crop production value for Georgia was cotton at \$937 million. Crop values in South Carolina totaled \$905 million, an increase of 41 percent from 2020. The value of corn for grain, at \$312 million, represented the largest value for South Carolina.

Value of Production for Select Crops – States and United States: 2020 and 2021

Crop	Alabama		Florida ¹		Georgia		South Carolina		United States ¹

(NA) Not available.

¹ The 2021 total value of production includes an estimated value of production for sugarcane for sugar and seed which is computed using 2020 prices.

² Preliminary.

³ The preliminary 2021 value of production is based on marketings and monthly prices received from August 1, 2021 - December 31, 2021.

⁴ The preliminary 2021 value of production will be published in [Agricultural Prices](#) released July 2022.

⁵ State and national totals may not add due to select crops only included in the table.
